

MOON LED ceiling light
A perfect combination of
contemporary design
and uniform soft light

350

18W/ 25W LED

MOON

According to designer OLIVER KÖNIGS, MOON is a new interpretation of the classic ceiling light. Available in both round volume-emitting and diffused area lighting, it brings an elegant contemporary influence feel to an architectural lighting scheme. In each style, MOON is formally reduced to the most universal of all shapes: the plain and perfect circle.

One of the most outstanding features of MOON is its low profile, due to the use of LED bulbs. Its surface-mounted design creates a completely smooth and elegant appearance. The recessed version, with its minimal height, facilitates many options even when there is little space available.

MOON uses an innovative modular technology concept with an interchangeable lighting engine at its core. Thus, a large variety of product configurations are available to customize the illumination to a variety of lighting situations.

Gemäss dem Designer OLIVER KÖNIGS ist MOON gleichzeitig Neuinterpretation der klassischen Deckenleuchte und zeitgemäss Umsetzung der eleganten architektonischen Lichtfläche. Denn sie ist sowohl als räumlich strahlendes Volumen als auch als diffus leuchtende Lichtfläche erhältlich. In beiden Fällen ist die MOON formal reduziert auf die universelle aller Formen, den schlichten, perfekten Kreis.

Formal herausstechend ist dabei die durch LED ermöglichte, geringe Höhe der MOON. In den Aufbauversionen erhält die Leuchte dadurch eine besonders elegante und schlanke Erscheinung. Und in den Einbauversionen eröffnen sich durch die reduzierte Höhe ganz neue Möglichkeiten auch bei schwierigen Platzverhältnissen.

Technisch zeichnet sich die MOON durch ein innovatives Baukastenprinzip aus, in dessen Zentrum die austauschbare Lichteinheit installiert wird. Damit Kunden steht dadurch eine Vielzahl an unterschiedlichen Konfigurationen der Leuchte zur Verfügung, so dass sie sich in den unterschiedlichsten Situationen einsetzen lässt.

Oliver Königs

Features/ Eigenschaften

- MOON light engine is characterized by an innovative modular concept, which makes it easy to choose and utilize the luminaire in many different situations.
- Plain and perfect-circle shaped MOON provides you the most sophisticated architectural look of ceiling light. We put in the best design and advanced industrial art to perform smooth and flowing light performance. Minimalist, clean edge and flat cover interpret its contemporary design.
- Instead of vacuum-forming, the satin diffuse of MOON is made of high-end injection molding technique to create uniform and high lighting enjoyment. Micro prism sheet is optional, for anti-glare effect.
- Special twist & lock mechanism ensures easy installation.
- IP54 waterproof and dustproof, maintenance free.
- A Das MOON-Lichtmodul zeichnet sich durch ein innovatives Modularkonzept aus, das eine besondere Leuchte Auswahl und Verwendung der Leuchte in verschiedenen Situationen ermöglicht.
- Die MOON mit klar konturiert Vollmondform verleiht Ihrer Deckenbeleuchtung eine Optik, die den höchsten architektonischen Ansprüchen gerecht wird. Wir haben das Optimum an Design mit modernster Industrie Kunst gepaart, um eine flüssige, minimalistische Lichtleistung zu schaffen. Minimalistische, scharfkantige Konturen und eine flache Abdeckung sind Ausdruck ihres zeitgemäßen Designs.
- Das MOON-Lichtmodul wurde anstatt durch Vakuumtiefziehen mithilfe einer hochmodernen Spritzgusstechnik hergestellt, wodurch Sie in den Genuss einer herrlichen, gleichmässigen Beleuchtung kommen. Die Mikroprisma-Abdeckung ist optional und dient als Blendschutz.
- Der spezielle Twist & Lock-Mechanismus sorgt für eine einfache Installation.
- Wasser- und staubdicht nach IP54, wartungsfrei.

MOON / SURFACE MOUNTED LIGHT
M350S-VML

V: lighting Volume
M: surface Mounted
L: Low base

Features / Eigenschaften

- Volume lighting design provides comfortable lighting ambience.
- Surface mounted base, seamless steel with black or white powder coating.
- Low base, ultra-thin-design LED driver fixed above ceiling.
- Advanced twist & lock mechanism design, easy to install ceiling light engine.
- Robust ceiling light engine with injection-molded PC cover, IP54 protection.
- Modular design, customer can order installation base, lighting engine and LED driver separately.
- Das Umfeldbeleuchtungs-Design ermöglicht eine angenehme Lichtatmosphäre.
- Aufbausockel, nahtloser Stahl mit schwarzer oder weißer Pulverbeschichtung.
- Ultradünnnes Design mit niedrigem Sockel, LED-Treiber oberhalb der Decke montiert.
- Ausgereiftes Twist & Lock-System, einfach zu installierendes Deckenlichtmodul.
- Robustes Deckenlichtmodul mit Gehäuse aus Spritzguss-PC, Schutzart IP54.
- Modulares Design, Kunde kann Installationssockel, Lichtmodul und LED-Treiber separat bestellen.
