

FLUX
2021

COMPANY PROFILE

Flux started in 1992 and is today one of the leading public lighting companies in Sweden.

We produce high quality LED light fixtures for indoor and outdoor use in our factory just north of Stockholm. We aim to be fast and flexible in our production and beyond our standard product range we offer the possibility for customized solutions.

We have seen a rapid growth during the last years and 2020 our turnover was SEK 56 millions - an increase with 24% compared to the year before. Our own design and production generates 70% of our turnover.

In addition to our own production we represent exclusively in Sweden brands like Eclatec, Neko, Pracht, Halla, Osmont, Rovasi, Tehomet, Next, Kreon and Petridis.

We aim to always be creative and to help our clients in finding the best possible lighting solution and the optimal product mix for every single project. In every project we face new challenges. This has led us to a flexible way of working, where every project can have its own, unique design.

Since Flux product mix includes light fittings which are applicable in a wide area of situations, our customers are a very complex group: from restaurants to local authorities, from shop chains to real estate managers. The professions we have the most contact with are lighting designers, lighting consultants, architects, interior designers and engineers.

Please visit our homepage to have a closer look at the kind of products and projects we work with. And of course you are always welcome to contact us for more detailed information!

Best regards,
Flux AB
