

SANT

36

DESCRIPTION

An aluminium linear LED luminaire with an opal diffuser and a unique design. The SANT luminaires has an excellent performance, the embedded LED light sources achieve the operational efficiency of up to 150lm/W. The luminaires can be dimmable with direct-indirect lighting and the possibility of tunable white LED temperature as currently needed (2700K – 6500K). SANT is an ideal solution when low power consumption, high efficiency and attractive design are required. SANT may be used as a single standing or as a continuous lighting system.

MATERIAL

Body Anodised extruded aluminium profile
 Optical system Aluminium profile finished in epoxy powder coating
 Opal diffuser

TYPE

LIGHT SOURCE

LED

POWER SUPPLY

230V, 50Hz
 Other possible options are specified below product codes

Design: Rob van Beek
